CHAPTER 2
TABLE OF CONTENTS

PAGE

SECTION 1

1. MEASURING LENGTH AND DISTANCE 3-7
Historical, English and Metric Methods

2. MEASURING LONG PERIODS OF TIME 9-13
Origin of the Calendar

3. MEASURING SHORT PERIODS OF TIME 15-19
Decades, Centuries and Millenniums to Seconds, Minutes and Hours

4. MEASURING WEIGHT 21-25
Metric, Troy and Customary Systems

5. MEASURING TEMPERATURE . .27-31
Measurement Standards of Galileo, Fahrenheit and Celsius

SECTION 2

6. LIGHT 33-36
Speed, Illusions and Relationships, Discoveries of Olaus Roemer

7. ELECTRICITY 37-41
Conductors, Nonconductors, Experiments of Benjamin Franklin and Andre Ampere

8. LARGE NUMBERS AND THE MOLE 43-46
Place Values, Advent of Zero, Exponents and Applications in Science

PAGE

9. DERIVED UNITS AND SMALL NUMBERS 47-50
Surface Area, Negative Exponents, and Base Units

10. AREA AND DENSITY 51-54
Acres, Hectares, Volume, Base and Derived Units

SECTION 3

11. TOOLS FOR MEASURING TIME, MASS AND WEIGHT 55-59
Digital, Crystal and Atomic Clocks, Types of Scales

12. HEAT AND TEMPERATURE . .61-64
States of Matter, Fahrenheit and Kelvin Scales

13. CLIMATE 65-69
Historical aspects, Sources of Atmospheric Carbon Dioxide

14. WEATHER 71-74
Factors that Affect Change: Sun, Water and Wind Currents

15. EXPERIMENTAL SCIENCE . . .75-79
Logic Verses Experiments, Scientific Methodology
